MANIFESTO

Da sempre crediamo che si debba vivere sul pianeta in punta di piedi. Ecco perché continuiamo ad investire in tecnologie ecocompatibili e macchinari a basso impatto ambientale. Seguiamo le regole dell'economia circolare eliminando gli sprechi e facendo ricorso ai materiali riciclati.

L'abbigliamento che produciamo obbedisce a questa filosofia grazie a certificazioni rigorose: lo **Standard 100 by Oeko-Tex®**, che garantisce l'assenza di sostanze nocive nei tessuti, e il **GRS (Global Recycled Standard)**, sviluppato da Textile Exchange, che attesta l'uso di materiali riciclati e il rispetto di severi requisiti di tracciabilità, responsabilità sociale, ambientale e controllo chimico lungo l'intera filiera.

Entro il 2030 contiamo di ridurre l'impronta di carbonio del 30% per ogni unità venduta e aumentare del 20% l'utilizzo dei materiali responsabili. Sono passi importanti, a cui ne seguiranno molti altri. Perché l'amore per l'ambiente non basta mai.

We have always believed in taking great care of the planet we live on. That's why we continue to invest in eco-friendly technologies and machinery that has a low environmental impact. We abide by circular economy rules, eliminating waste and making use of recycled materials.

The clothing we make adheres to this philosophy thanks to strict certifications: **Standard 100 by Oeko-Tex®**, which guarantees the absence of harmful chemicals in fabrics, and **GRS (Global Recycled Standard)**, developed by Textile Exchange, which certifies the use of recycled materials and compliance with strict requirements in terms of traceability, social and environmental responsibility and chemical control throughout the entire production chain.

By 2030, we also aim to reduce our carbon footprint by 30% per unit sold and increase the use of sustainable materials by 20%. These are important steps, and many more are to come. Because you can never love the environment too much.

Siempre hemos pensado que debemos cuidar al máximo el planeta en que vivimos. Por eso no dejamos de invertir en tecnologías ecocompatibles y en máquinas con un bajo impacto ambiental. Nos guiamos por las reglas de la economía circular, eliminando el derroche y recurriendo a materiales reciclados.

La ropa que producimos respeta esta filosofía gracias a certificaciones rigurosas: el **Standard 100 by Oeko-Tex®**, que garantiza la ausencia de sustancias nocivas en los tejidos, y el **GRS (Global Recycled Standard)**, desarrollado por Textile Exchange, que certifica el uso de materiales reciclados y el respeto de requisitos estrictos de trazabilidad, responsabilidad social y ambiental y control químico a lo largo de toda la cadena de producción.

De aquí al año 2030 contamos con reducir nuestra huella de carbono en un 30% por cada unidad vendida y aumentar en un 20% el uso de materiales responsables. Son pasos importantes que irán seguidos de muchos otros. Porque el amor por el medio ambiente nunca es demasiado.

With Erreà, sport and health run side by side.

Con Erreà, el deporte y la salud siempre van de la mano.

**Con Erreà, sport e salute
corrono sempre insieme.**

TI-ENERGY: THE NEW **ANTI-VIRAL*** FABRIC

Fruit of state-of-the-art technologies in the field of advanced polymers and of the experience gained in the use of nanotechnologies since 2008, the Erreà research and development team is **presenting Ti-Energy, the new antiviral* fabric.**

This truly important achievement in the world of fabrics was made possible by the use of two separate technologies: **the zinc oxide nanoparticles**, permanently encapsulated in the fibres, **have antiviral* and antimicrobial properties**, and the **Minusine J1+** treatment which makes the fabric super-impermeable to liquids. This dual function allows the fabric to form an effective **protective barrier against droplets, liquids, bacteria and viruses**.

Oeko-Tex Standard 100 certified, Ti-energy will also be available to all sports clubs that want to use it to enhance the safety of their athletes.

*Tests performed in accordance with ISO 18184 using the SARS-CoV-2 virus, have proved that in the laboratory, **Ti-energy®3.0** can reduce the viral load by 99.85% compared to a standard polyester fabric six hours after coming into contact with the virus.

Fruto de las tecnologías más modernas en el campo de los polímeros avanzados y de la experiencia adquirida en el uso de las nanotecnologías, que se remonta a 2008, la División de Investigación y Desarrollo de Ereà presenta su **nuevo tejido antiviral* Ti-Energy**.

Se trata de un resultado extraordinario logrado en el ámbito textil gracias a la utilización de dos tecnologías diferentes: la presencia de **nanopartículas de óxido de zinc** encapsuladas permanentemente en las fibras de los tejidos para obtener una **eficacia antiviral* y antibacteriana**, y el **tratamiento Minusnine J1+**, que otorga una impermeabilidad extrema a los líquidos. Esta doble funcionalización permite que el tejido se convierta en una barrera **protectora eficaz contra gotitas, líquidos, bacterias y virus**.

*Las pruebas realizadas según la norma ISO 18184, utilizando el virus SARS-CoV-2, han demostrado que en laboratorio el tejido Ti-Energy® 3.0 disminuye la carga viral del 99,85% en comparación con un tejido común de poliéster después de 6 horas de contacto con el virus.
